

ARK SRIVASTAVA

Data Analyst · B.Tech Computer Science & Engineering · Graduating 2026

+91-9999651544 | hi.arksrivastava@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Immediate Joiner

PROFESSIONAL SUMMARY

Detail-oriented B.Tech Computer Science student (Galgotias University, 2026) with hands-on experience in data analysis, exploratory data analysis (EDA), data wrangling, and data visualisation using Python, Pandas, NumPy, Matplotlib, and Seaborn. Proficient in SQL (MySQL) for querying, data extraction, and database management. Built a clinical heart disease analysis project — merging multiple datasets, performing statistical analysis, and presenting data-driven insights through clear visualisations. Experienced in data cleansing, data preprocessing, and working with structured data pipelines. Strong analytical thinking and communication skills with demonstrated ability to manage tasks independently and collaborate within cross-functional, remote-compatible team environments. Eager to apply data analytics skills to deliver actionable business insights.

TECHNICAL SKILLS

Data Analysis & EDA: Exploratory Data Analysis (EDA), Data Wrangling, Data Cleansing, Statistical Analysis, Descriptive Statistics, Correlation Analysis, Outlier Detection, Data Preprocessing, Dataset Merging

Data Visualisation: Matplotlib, Seaborn, Python Dashboards, Google Data Studio (familiar), Power BI (familiar), Chart Design, Interactive Visual Reporting, Insight Communication

SQL & Databases: MySQL — Querying, Data Extraction, Joins, Aggregations, Filtering, Subqueries; MongoDB — NoSQL data handling and preprocessing

Python for Data Analysis: Pandas, NumPy, Scikit-learn (statistical modelling), Jupyter Notebook, Data Manipulation, Automation Scripting, JSON Data Pipelines

Reporting & Productivity Tools: Excel (data reporting, pivot tables, analysis), Git, GitHub, VS Code, Postman, Netlify

Statistical & Predictive Modelling: Classification, Regression, Model Evaluation (Accuracy, Precision, Recall, F1-Score, ROC-AUC), Cross-Validation, Feature Engineering

Soft Skills: Analytical thinking, data-driven communication, problem solving, independent task management, remote team collaboration

DATA ANALYSIS PROJECTS

Clinical Heart Disease Data Analysis & Predictive Modelling · Python · Pandas · NumPy · Matplotlib · Seaborn · SQL (MySQL) · Scikit-learn · Jupyter Notebook

- Collected and merged three real-world clinical datasets (UCI Cleveland, Kaggle Heart Disease, supplementary data) into a unified analytical corpus — performing thorough data cleansing, missing value treatment, and data wrangling using Pandas.
- Conducted comprehensive Exploratory Data Analysis (EDA): analysed feature distributions, performed correlation analysis, detected outliers, and identified key statistical relationships between clinical variables and heart disease outcomes.
- Visualised findings through Matplotlib and Seaborn charts including distribution plots, heatmaps, box plots, and ROC curves — clearly communicating data-driven insights to a non-technical audience.
- Applied statistical modelling and predictive techniques (Logistic Regression, Random Forest, SVM, XGBoost) to validate analytical findings; evaluated models using Accuracy, Precision, Recall, F1-Score, and ROC-AUC metrics.
- Documented the full analysis workflow in a structured, reproducible Jupyter Notebook — demonstrating professional data reporting and presentation standards expected in analytics roles.

Expenzo — Financial Data Analysis & Reporting Dashboard · Python · Pandas · Data Visualisation · Rule-Based Classification · JavaScript

- Designed and built a personal finance analytics application that automatically categorises, aggregates, and analyses expense data using rule-based classification logic and structured data pipelines.
- Developed interactive data visualisation dashboards (bar charts, trend lines, category breakdowns) to surface spending patterns and financial insights — directly applying data reporting and visual communication skills.
- Integrated AI-generated natural-language summaries (OpenAI API) to translate data findings into clear, accessible insights for end users, demonstrating strong data communication capabilities.

EDUCATION

Galgotias University, Greater Noida, Uttar Pradesh 2022 – 2026 (Expected)

Bachelor of Technology — Computer Science and Engineering

- Relevant Coursework: Data Science, Artificial Intelligence, Machine Learning, Python Programming, Statistics & Mathematics, Data Structures & Algorithms, Database Management Systems (SQL), Computer Networks

Ramjas School, New Delhi 2019 – 2021

Class XI – XII · Science Stream (Physics, Chemistry, Mathematics)

ADDITIONAL INFORMATION

GitHub: github.com/ArkSrivastava ·

Portfolio: arksrivastava.netlify.app

Areas of Interest: Data Analytics · Exploratory Data Analysis · Data Visualisation · SQL & Database Analytics · Statistical Modelling · Business Intelligence · Python for Data

Availability: Immediate joiner | Open to night shifts | Willing to relocate to work

Languages: English (Fluent — oral and written) · Hindi (Native)
