

ARK SRIVASTAVA

B.Tech Computer Science & Engineering | Galgotias University | 2026

+91-9999651544 | hi.arksrivastava@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Immediate Joiner

PROFESSIONAL SUMMARY

Results-driven B.Tech Computer Science graduate (2026 batch, Galgotias University) with hands-on experience in full-stack development, SQL database management, REST API integration, and production-level debugging. Skilled in MySQL, MongoDB, Node.js, and React.js with a demonstrated ability to monitor systems, triage issues, and resolve problems efficiently. Strong communication skills — both oral and written — with the ability to quickly adapt to new domains. Comfortable with night shifts and immediate joining. Seeking to contribute as an Associate Solution Engineer at Indus Valley Partners, supporting enterprise fintech products for global buy-side firms.

TECHNICAL SKILLS

Databases & SQL: MySQL, MongoDB — complex queries, joins, aggregations, indexing, data validation

Backend Development: Node.js, Express.js, Java (Spring Boot), Next.js, REST APIs

Frontend Development: React.js, HTML5, CSS3, JavaScript (ES6+)

Programming Languages: Java, JavaScript, Python

Testing & Debugging: Systematic bug reproduction, unit testing, API testing, efficient debugging

Tools & Platforms: Git, GitHub, Figma, VS Code, Postman

Soft Skills: Client communication, analytical thinking, quick learner, team collaboration, task prioritization

WORK EXPERIENCE

Codec Technologies July 2025 – August 2025

MERN-Stack Developer Intern

- Developed and monitored full-stack web applications using React.js, Node.js, and Express.js to ensure stable production functionality.
- Wrote and optimized MySQL and MongoDB queries for backend data management, improving data retrieval efficiency.
- Performed daily monitoring of application health, identified failures, and resolved issues with minimal supervision.
- Communicated progress, blockers, and solutions clearly with team leads — strengthening oral and written communication skills.

CodTech IT Solutions June 2025 – August 2025

Full-Stack Developer Intern

- Built and maintained production-ready web applications, performing systematic monitoring of feature stability and data integrity.
- Integrated and validated REST APIs, troubleshooting response anomalies and ensuring seamless data flow across services.
- Assisted senior developers in issue triage, bug reproduction, and documentation — mirroring support engineering workflows.
- Demonstrated debugging proficiency by resolving cross-layer issues across frontend and backend in a collaborative team environment.

CodeAlpha February 2025 – May 2025

Web Developer Intern

- Developed responsive web applications including a real-time UI, applying testing and debugging techniques to ensure reliability.
- Proactively explored new web technologies and applied them to simulated client projects, showcasing quick learning ability.
- Collaborated with team members to understand project requirements and deliver clean, well-tested code on schedule.

EDUCATION

Galgotias University, Greater Noida, Uttar Pradesh 2022 – 2026 (Expected)

Bachelor of Technology — Computer Science and Engineering

Relevant Coursework: Database Management Systems, SQL, Data Structures & Algorithms, Operating Systems, Computer Networks, Software Engineering

Ramjas School, New Delhi 2019 – 2021

Class XI – XII: Science (Physics, Chemistry, Mathematics)

RELEVANT PROJECTS

Grabzy — E-Commerce Platform | *React.js | Node.js | MongoDB | Express.js*

- Built a production-grade e-commerce platform with user authentication, product catalog management, and cart — demonstrating capability to build and manage data-heavy applications.
- Designed RESTful APIs and wrote complex MongoDB queries, handling real-time data operations reliably.

Lynq — Social Media Platform | *React.js | Node.js | MongoDB | Express.js | Socket.IO*

- Developed a full-stack platform with real-time features, authentication, and scalable database design using MongoDB and Node.js.
- Debugged and resolved performance issues across frontend and backend layers, simulating production-level support scenarios.

Live Chat App | *JavaScript | Node.js | Socket.IO | WebSockets*

- Built a real-time messaging application with WebSocket communication and live connection-state monitoring.
- Handled user events (join/leave, typing indicators) — building skills in monitoring real-time application events.

Expenzo — AI-Powered Expense Tracker | *JavaScript | Data Visualization | AI Logic*

- Created a financial data tracker with AI-based categorization, interactive charts, and persistent storage — directly relevant to IVP's fintech data management domain.
- Structured and queried financial datasets, applying logic similar to enterprise-level data reporting workflows.

Interactive Sudoku Solver | *JavaScript | Backtracking Algorithm | DOM Manipulation*

- Implemented a backtracking algorithm with real-time visual feedback, demonstrating strong analytical and algorithmic problem-solving skills.

ADDITIONAL INFORMATION

Availability: Immediate joiner | Open to night shifts | Willing to relocate to work

Languages: English (Fluent — oral and written), Hindi (Native)
